1. About American Wellness Authority:

Our journey began long ago, first at a retail store in North Carolina and then online. Over the years, we've sold some of the country's most iconic brands. Ranging in categories like fitness accessories, professional beauty, healthcare, gourmet food, personal care, and many in between. We've sold thousands of SKUs to happy customers all over North America, and we feel truly blessed for the opportunity.

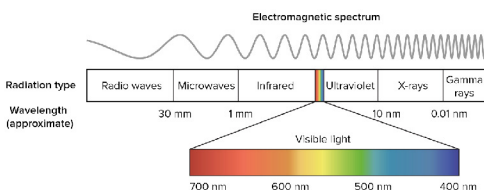

During the Pandemic, we realized how difficult it was to continue delivering our best sellers. We couldn't replenish our stock and there wasn't much we could do. We didn't have control of the production. We couldn't change any designs or product capabilities. With our options limited, we decided to double down on our knowledge and experience, and bring to you American Wellness Authority, or AWA for short.

Since then, our team of 10 spent countless months researching and debating. Searching for ways to deliver practical products, one's we'd be proud of. Our focus was on things that make people feel good and could enhance their lives in one way or another.

So we set out on our journey, and here we are today. We couldn't be more excited to share this with you. And we sincerely appreciate your taking an interest in our product and our company. We're a small, family-run business and there isn't enough we can do to say, thank you.

2. About Light Therapy:

Light is a composition of various electromagnetic waves. The white light that we see has a spectrum of 7 different color lights with different wavelengths.

Different wavelengths of visible light penetrate the skin at different depths. Depending on how deeply they penetrate, LED lights to have different biological effects that treat various skin and muscle-related

Red Light Therapy (630nm):

It can improve cell activity, speed up metabolism, and promote collagen formation. It has the effects of whitening and lightening, rejuvenating & wrinkling, increasing skin elasticity, improving skin condition, repairing damaged skin, reducing pores and tightening skin, anti-aging and anti-oxidation.

Blue Light Therapy (470nm):

It has the effect of bactericidal, anti-inflammatory and inhibiting inflammation, and can remove acne and sores, sterilize and reduce inflammation, repair skin, and leave no scars and pigments.

Green Light Therapy (520nm):

It can reduce the secretion of skin oil, balance the skin, effectively relieve stress, dredge lymph and drain swelling.

Purple Light Therapy (390nm):

It is a dual-frequency light of red light and blue light. It combines the effects of two kinds of phototherapy, especially in the treatment of acne and acne scars and has a particularly good effect and repairing effect.

Cyan Light Therapy (490nm):

It can increase cell energy step by step, and has a good effect on metabolism.

Yellow Light Therapy (590nm):

Replenish energy to skin cells, decompose pigments, promote lymphatic drainage, improve skin roughness and wrinkles, treat skin redness, fever, ringworm, etc., and enhance immunity.

White Light Therapy (mix):

Penetrates the deep layers of the skin, accelerates skin metabolism, breaks down pigment spots, improves fine lines and sagging skin.

- Do not immerse the mask in water or use harsh chemicals for cleaning.

8. Storage:

- Store the mask in a cool, dry place away from direct sunlight.
- Avoid bending or folding the mask to maintain its shape and functionality.

9. FAQs:

What are the EMF levels?

For best results, use the mask 3-4 times per week.

Can I use skincare products with the mask?

Yes, you can apply your usual skincare products before using the mask.

Can I share the mask with others?

It is recommended to use the mask individually for hygiene purposes.

For How long should the device be used for effective treatments?

Commit to a three-week usage plan. While many people achieve relief from Red Light Therapy rather quickly, others see measurable relief incrementally over time.

Therapy response time varies depending on skin type.

Does light therapy work the same for all skin types?

Light therapy is an effective option for all skin types and pigmentation. It's just important to use the treatment regularly to achieve optimal results.

Does red light therapy work through clothes, bandages, or dressings?

Unfortunately, red light therapy does not work through clothes, bandages, or dressings. This is because the red light must glow on your skin for it to be absorbed correctly. If used on clothes, the light will be absorbed by the fabric.
